

Cybertronix Modular Solar and Battery Time-lapse for Axis Cameras:

- Triggered by internal real-time clock
- 1 shot every 30 minutes
- Power to camera and 4G router is off between shots
- Shown with Axis M3115-LVE, low light 55Wp solar panel and 70Wh battery
- Server-side software collects stills, builds videos and publishes them
- Backup image saved locally on SD card in camera in case of 4G issues
- YouTube: <https://www.youtube.com/watch?v=RF7EnlwSFLc>
